This CDL practice test study guide contains air brake system information for those who drive vehicles with air brakes; therefore needing an "Air Brakes" endorsement on their CDL license. Air Brakes written exam practice test questions and answers.

Statistics indicate that defects in brake system contribute significantly to fatal crashes involving commercial vehicles. Hence there is a need for developing preventive and active safety measures for assessing the performance of an air brake system in trucks. Existing techniques for assessing the performance of brakes are infrastructure intensive, time and labor intensive. The premise of this thesis is that model-based diagnostic techniques can be employed to overcome these limitations of existing techniques. The design of a model-based diagnostic system requires the development and experimental corroboration of a mathematical model of the evolution of pressure in each brake chamber of a truck in response to the application of brake pedal input by the driver, when there are no faults or defects in the brake system. This thesis is aimed at modeling and experimentally corroborating a subsystem of an air brake system, namely the pneumatic relay valve. The pneumatic relay valve takes a input signal from the primary delivery of a treadle valve and meters air from a storage reservoir to Type 30 rear brake chambers. A description of the development of the model, the experimental setup and corroborating experimental results are provided.

Beginning with entry-level explanations of the critical systems and advancing to the standard required of ASE L4 and L5 certification testing, this stand-alone book is a first-rate primer in the study of highway truck and trailer brake, suspension, and steering systems. Modular in format, the book's chapters cover basic principles directed to specific, performance-based learning outcomes. Step-by-step photo sequences for many critical shop-based tasks and an emphasis on troubleshooting help learners make the connection between conceptual and hands-on learning.
