HOW TO DEFEND EARTH AGAINST AN ALIEN INVASION. This writer believes that the document produced by British UFOlogist Nick Pope for the UK Ministry of Defence contains serious flaws that need to be addressed. The main problem I find with Mr. Pope's document is that it considers the idea of a hostile alien invasion from a perspective that is rooted exclusively in the material realm when, in reality, there are two other realms that need to be taken into consideration, namely, the mental and ...

What if there really are aliens and they do attack? Read what two scientists reveal in this "how-to" survival manual for the space age. Some events (such as a deliberate asteroid strike) produce such a massive setback to life, the Earth and humanity that we must understand and prepare for them, even if the chances are low that they'll come about. But where to begin? Drs. Travis S. Taylor and Bob Boan are experienced scientists, physicists with expertise in both defense and military signal intelligence and experience working with the Department of Defense and NASA. These two intellectual heavyweights take us on an amazing journey through what we do³/₄and do not³/₄know about how to defend ourselves from space. Sure, that day may never come in our lifetimes³/₄but everyone should have a copy of this lying around just in case. . . . At the publisher's request, this title is sold without DRM (Digital Rights Management).

Resistance is Your Prime Directive Have you ever experienced a sensation of missing time? Have you ever found a metallic implant somewhere in your body? It's likely that you're a victim of alien abduction, and you don't even know it. Aliens are among us. While the true intentions of these mysterious intruders from outer space are unknown, there's no doubt that their actions are nefarious. It's your right - your civic responsibility - to learn the skills necessary to protect yourself, your loved ones and ultimately your planet. Aliens want to whisk you away in the night to perform terrifying experiments on you. Isn't it time you learn how use your MP3 player to defend yourself from their paralyzing powers? Shouldn't you know how to evade the pursuit of a flying saucer? Wouldn't you sleep better at night knowing some proven hand-to-hand combat techniques guaranteed to stop your extraterrestrial foe in its tracks? Make no mistake - our world is under attack and this handbook may be the only thing standing between the human race and total annihilation. Read it and join the resistance.

The ultimate survival guide for the ultimate attack – written by two top scientists who know their subject inside and out! An amazing journey through what we do – and do not – know about how to defend ourselves before, during and after an alien invasion from space. What if there really are aliens and they do attack? Read what two scientists reveal in this “how-to” survival manual for the space age. Alien invasion. Unlikely? As unlikely as Pearl Harbor? The extinction of the dinosaurs? A meteor strike that levels whole forests in Siberia? You get the drift. Some events produce such a massive setback to life, the Earth and to humanity that we must understand and prepare for them, even if the chances are low that they’ll come about. In fact, it will be criminal and abrogation of our duty to future generations if we do not get ready! But where to begin? Drs. Travis S. Taylor and Bob Boan have the answers. Both are experienced scientists, physicists with expertise in both defense and military signal intelligence and experience working with both the Department of Defense and NASA. These are intellectual heavyweights who have a clear idea of the possibilities of alien contact, the calculations of whether or not that contact will be friendly...and what to do if it’s not. An amazing journey through what we do – and do not – know about how to defend ourselves from space. Sure, that day may never come in our lifetimes – but everyone should have a copy of this lying around JUST IN CASE. Heck, better yet, why not commit a few of these scientists solutions to memory! Just in case. About Travis S. Taylor’s ground-breaking popular fiction: “...explodes with inventive action...dazzling, cutting edge scientific possibilities...” – Publishers Weekly About Alien Invasion: “In a business that strictly separates technology and conjecture, this is a well considered, very comprehensive work. United States Space is a serious business, but what IF there is an external threat?”— Dr Byron Knight, NRO Chief Scientist, MASINT “...the definitive book on the defense of earth against a potential alien incursion....the book also serves as an important primer on the potential future of warfare on every level. It is tightly grounded in current day realities of war and extrapolates thoughtfully but closely about future potentials. It should be on the reading list of anyone who is serious about national security and the future of war.” — John Ringo, New York Times best-selling author of military SF “It looks like the time has come to take a serious look at planetary defense from all aspects. This book introduces the subject in a way to stir thoughtful and intelligent debate. Hats off to the authors.” — Gerald B. Helman, former US Ambassador to the UN Geneva and Undersecretary of State for Political Affairs

They're coming! Earth is the target of a possible invasion by aliens from outer space! You have been called to action! What should you do? Should you join the Space Force and head into deep space to fight this new enemy, or should you remain on Earth to help defend the planet from these invaders? Your choices will determine your fate and the fate of all the inhabitants of Earth.

It has been 6 months since the alien Invasion of 2018. In that time, the Earth Defense Sector- Tach, Fitz, Suika, John, Andrews, and T- has gone from a barely-functioning group to the world's first superhero team. Now, they are tasked with finding rouge weapons-designer Saeko Nejire, who has been accused of being responsible for several recent terrorist attacks. But the team soon realizes that they have much more than a terror group to deal with, and they might be the only ones who can prevent the Earth from another invasion- and this time, they have much less to work with and much less time to prevent disastrous consequences for the entire Human race...

With many of the world's top scientists now predicting that the Earth will be invaded by aliens within the next few decades, the battle to defend our planet

from fiendish extra-terrestrials is no longer the realm of science fiction. UFO sightings and abduction cases continue to increase, with millions around the world now reporting that they have been held by aliens - everything is pointing to a day when we will be invaded by forces from beyond our Solar System. But don't panic - the Alien Invasion Owners' Resistance Manual has been designed to provide you with the very latest scientific insight and intelligence available on aliens and their plans to take over our gleaming blue planet. In true Haynes style, it aims to demonstrate how with the right knowledge, training and a substantial reel of aluminum foil, the concerned citizen can really hit ET where it hurts. You can protect your home and family from mind-bending abductions, you can ensure that you remain free of any sinister implants and you can determine which shape-shifting lizards are working to take over society. Accompanied by illustrations, maps, diagrams and step-by-step instructions, this resistance manual will be essential reading for those interested in protecting the planet from alien invaders. - Discover the truth about aliens and how they have already infiltrated Earth - Learn the real story behind the Roswell crash, Area 51 and terrifying facts about alien abductions - Read about the alien species that threaten us -from the DNA-hungry Greys to the shape shifting Draconian reptiles - Become an Extra-terrestrial Prepper - trained and ready to defend our planet - Create an abduction 'safe room' in your home and learn how to fight alien invaders - A comprehensive analysis of alien invasion strategies and how humanity can defeat them - A complete blueprint to the defending of our Solar System - Plus hundreds of new uses for aluminum foil

It goes without saying that robots kill. They hunt, swarm, and fire lasers from their eyes. They even beat humans at chess. So who better to stand with us when the real villains arrive? Movies instruct us that, whether we like it or not, we will one day be under siege by pirates, ninjas, zombies, aliens, and Godzilla. Also great white sharks. And-let's face it-we're not prepared. But with the advice contained in this brilliantly illustrated, ingenious book, you can build your own robot army to fend off hordes of bloodthirsty foes. From common-sense injunctions ("never approach an unfamiliar robot in a militarized zone") to tactical pointers ("low-power radar beats cameras for detecting mummies in a fog-shrouded crypt") to engineering advice ("passive-dynamic exoskeleton suits will increase sprint speeds but not leg strength"), this book contains all the wisdom you'll need to fend off the coming apocalypse. Witty, informative, and utterly original, How to Build a Robot Army is the ideal book for readers of any age.

From the bestselling author of "Ready Player One." After sighting a UFO, high-school student Zack and his new comrades must scramble to prepare for an alien onslaught, in this rollicking, surprising thriller and coming-of-age adventure.

The people of Texas were living normally when they received a surprising visit from an extra terrestrial leader of a dark galaxy attacking Texas and making this invasion only the beginning to conquer Earth. The army couldn't stop him, but out of nowhere, some human mortals who lived on Earth have been developing the power of controlling elements like fire and water. They faced that monster again and again in battles reviving the era of epics. Many legendary creatures aided that dark leader while the heroes to be doing their best to defend their planet and stop the invasion that would end the human race.
