## Performance Analysis ... Perl Pdq

Performance = (1 / Execution time)

And, (Performance of A / Performance  
of B) = (Execution Time of B /

Execution Time of A) If given that

Processor A is faster than processor  
B, that means execution time of A is  
less than that of execution time of B.

# Read Free Analyzing Computer Systems

Therefore, performance of A is greater than that of performance of B.
