A surprisingly simple way for students to master any subject--based on one of the world's most popular

online courses and the bestselling book *A Mind for Numbers* and its wildly popular online companion course "Learning How to Learn" have empowered more than two million learners of all ages from around the world to master subjects that they once struggled with. Fans often wish they'd discovered these learning strategies earlier and ask how they can help their kids master these skills as well. Now in this new book for kids and teens, the authors reveal how to make the most of time spent studying. We all have the tools to learn what might not seem to come naturally to us at first--the secret is to understand how the brain works so we can unlock its power. This book explains:

- Why sometimes letting your mind wander is an important part of the learning process
- How to avoid "rut think" in order to think outside the box
- Why having a poor memory can be a good thing
- The value of metaphors in developing understanding
- A simple, yet powerful, way to stop procrastinating

Filled with illustrations, application questions, and exercises, this book makes learning easy and fun.

Have you ever wondered:

1. Who built the Pyramids of Egypt and who are their descendents today?
2. Why does the author challenge the great Greek historian Herodotus, by auguring that Egypt is more a gift from the Fellahin, than a gift of the Nile?
3. What great event happened in the early 1960s that completely changed the life of the peasants of Egypt?
4. Why did the peasants (fellahin) of Egypt not engage in a massive revolt in the 1990s, when the Government allowed landowners to reclaim their land that the peasants had been cultivating for over 30 years?
5. Do you know the story of the village of Dinshaway that precipitated a national crisis, and that eventually forced Great Britain to leave Egypt after over fifty years of colonial rule?
6. Are the villagers of Egypt prone to violence or to submissiveness and what does that tell us about the future of Egypt?
7. Which farmers in the world have the highest yields in wheat, rice and corn?
8. Are the villagers of Egypt favorable to the Islamic extremist or more favorable to some form of democracy based upon moderate Islam?
9. Where do villagers say they want to live, if they could live any place in the world?
10. Why did a friend email the author on September 12, 2012 and tell him: Please tell the American people that the Egyptians they see storming the American embassy do not represent the people of Egypt. They are mostly a misguided minority of people who see the world through clouded glasses of hatred and bigotry, provoked and misinformed by extremists who share an agenda that is unIslamic, violent and destructive for Egypt's future.

Dr. James Mayfield, professor of Middle East Studies since 1967, has been studying the villages of Egypt (as a student, professor, researcher, trainer, manager and consultant) for over 40 years. This is a very comprehensive, multi-disciplinary, study of the rural Egypt. This book presents chapters on the history, the culture, the local government system, village schools and health care systems, the agricultural systems, causes and solutions for extreme poverty, the challenge of establishing a civil society in Egypt, and what prospects there are for democracy in Egypt. Each chapter includes a short narration story that brings the existence and culture of the Egyptian villagers to life through short but rich examples of how the Egyptian peasants (fellahin) live, work and survive in a world filled with challenges, problems, but also opportunities and hope for the future.
