First In Architecture provides guides, resources and downloads to architecture students and professionals to help them with their studies and future careers

"This major new collection introduces architecture to the beginning student or anyone who wants to learn about the built environment"--

Study drawings play a key role in the exploration and development of architecture in the early stages of design. Yet, these principal tools for graphic thinking have been largely taken for granted in the design professions. This guide brings study drawings into the foreground by analyzing actual drawings used by architects past and present. Architectural Study Drawings is the first source to provide a basis for understanding the primary means of graphic thinking used in the creation of these drawings. It also explains versatile applications of these drawings in architectural practice, teaching, and research. Evaluations of more than 80 drawings and diagrams demonstrate how study drawings are active participants in--rather than passive records of--the designer's graphic thinking. The author probes characteristics and properties of study drawings, in addition to how graphic and cognitive processes combine to guide design decision-making. Drawings of great past architects ranging from Leonardo da Vinci and Le Corbusier to Carlo Scarpa are analyzed. Excerpts are included from recent interviews with five contemporary architects--Joseph Esherick, Helmut Jahn, Robert Stern, Stanley Tigerman, and Peter Eisenman. Readers will learn from these masters how to enhance the value of study drawings in various design situations. Throughout, the author clarifies how theoretical aspects of study drawings relate to actual design practice. Detailed chapters discuss key topics such as: * The theoretical structure of study drawings * Applications for handmade drawings * How to make better use of current computer-aided design (CAD) systems * Examples of drafting room dialogue in practice that help improve design working processes Architectural Study Drawings offers valuable insights that can be applied on the drawing board in the school and office, in teaching of both media and design, and in research and development for CAD systems.

For better plans-and better projects The complete guide to site analysis Site analysis is the key to a well-designed project. In fact, the careful and complete analysis of a site and its surrounding context can lead to better development proposals, smoother design implementation, and, ultimately, higher quality built environments. This carefully conceived book is the first to detail each crucial step in the site analysis and planning process, from site selection through design development. It shows how these activities are integrated to arrive at a site plan that successfully balances the needs of the client and other stakeholders with the site's suitability for the intended land uses. With more than 130 illustrations, this book includes many outstanding examples of maps and site plans created by leading land planning firms. It offers guidance on:

- * Site identification, evaluation, and selection
- * Site inventories of physical, biological, and cultural attributes
- * Land use suitability analysis using Geographic Information Systems (GIS)
- * Concept planning and design development
- * Graphic communication with clients, government agencies, and other stakeholders

Filled with need-to-know information on the entire land planning and design process, *Site Analysis* is a vital addition to the library of students and professionals in landscape architecture, urban design and planning, and related areas.

Landscape Architectural Graphic Standards is an entirely new, definitive reference work for everyone involved with landscape architecture, design, and construction. Based on the 70-year success of *Architectural Graphic Standards*, this new book is destined to become the "bible" for the landscape field.

The Art of City Sketching: A Field Manual guides you through the laborious and sometimes complex process of sketching what you see in the built environment so that you can learn to draw what you imagine. Illustrated with hundreds of drawings by students and professionals of cityscapes around Europe and the United States, the book helps you develop your conceptual drawing skills so that you can communicate graphically to represent the built environment. Short exercises, projects, drawing tips, step-by-step demonstrations, and composition do's and don'ts make it easy for you to get out into the city and experiment in your own work. Author Michael Abrams uses his experience as a field sketching instructor, to show you that by drawing, you can discover, analyze, and comprehend the built environment.

An architecture portfolio designed by Alex Hogrefe describing 4 original projects with a focus on unique representational techniques and styles.

The process-oriented guide to context-sensitive site selection, planning, and design *Sustainable design* is responsive to context. And each site has a unique set of physical, biological, cultural, and legal attributes that presents different opportunities and constraints for alternative uses of the site. Site analysis systematically evaluates these on-site and off-site factors to inform the design of places—including neighborhoods and communities—that are attractive, walkable, and climate-resilient. This Third Edition of *Site Analysis* is fully updated to cover the latest topics in low-impact, location-efficient design and development. This complete, user-friendly guide:

- Blends theory and practice from the fields of landscape architecture, urban planning, architecture, geography, and urban design
- Addresses important sustainability topics, including LEED-ND, Sustainable Sites, STAR community index, and climate adaptation
- Details the objectives and visualization methods used in each phase of the site planning and design process
- Explains the influence of codes, ordinances, and site plan approval processes on the design of the built environment
- Includes more than 200 illustrations and eight case studies of projects completed by leading planning and
