December 6, 2016. Eli Anapur. Perception in art stands for a complex relation between visual stimuli and a personal understanding of them. It is a theoretical postulate that aims to clarify the relation between artworks and individual opinions and evaluations. Far from being a universally established matrix of understanding art, perception is conditioned by a context from which observation and evaluation are made.

Art and Visual Perception: Amazon.co.uk: Arnheim, R.: Books

Visual perception is the ability to interpret the surrounding environment using light in the visible spectrum reflected by the objects in the environment. This is different from visual acuity, which refers to how clearly a person sees. A person can have problems with visual perceptual processing even if they have 20/20 vision. The resulting perception is also known as visual perception, eyesight, sight, or vision. The various physiological components involved in vision are referred to collectively

Visual art and visual perception [Visual art] has become a minor cul-de-sac orthogonal to THE ART of the museum directors and billionaire collectors. THE ART is conceptual, instead of visual. Among its cherished items are the tins of artist's shit (Piero Manzoni, 1961, Merda d'Artista) [worth their weight in gold].
