We want to make sure these questions are tough enough to really test your readiness and draw your focus to the weak areas. You should use this product as a learning/tutoring tool. Use it together with other study resources for the best possible exam prep coverage.

Disturbing asbestos materials during construction is a serious hazard that all contractors may encounter. Because of the insidious nature of the material as a health hazard, EPA regulations require that even when a structure is to be completely demolished, asbestos (and all other hazardous materials) must be removed by a qualified contractor prior to general demolition. A construction contractor contemplating abatement work needs to ascertain regulatory applicability under one of the following: OSHA-approved state program, Federal OSHA regulations (applicable to the private sector and certain federal employees) or OSHA-approved. Construction Worksite Compliance Guide to Asbestos provides the contractors, building owners and inspectors with the current best management practices for asbestos removal and disposal methods. Packed with checklist, tables and "quick lookup" materials, this manual provides a step by step approach for identifying asbestos, complying with OSHA and EPA regulations as well as the safe disposal of asbestos. Ascertain the presence of asbestos through testing Prepare the abatement plan Submit the plan to the state, EPA or local municipality having jurisdiction Proper

Waste Disposal techniques Scope of work

Provides guidance on controlling asbestos-containing materials (ACM) found in buildings. Provides a current summary of data on exposure to airborne asbestos; gives survey procedures for determining if ACM is present in buildings; explains how to establish a special operations and maintenance program in a building found to contain asbestos; reviews technical issues confronted when assessing the potential for exposure to airborne asbestos, in particular indoor settings; suggests a structured process for selecting a particular course of action, and much more. Commonly referred to as the Blue Book.

The U.S. requires each elementary and secondary school to perform an inspection for asbestos-containing building material and to prepare an asbestos management plan.
