Evolution Answer

One piece of evidence offered by Darwin is found in the science of paleontology. Paleontology deals with locating, cataloging, and interpreting the life forms that existed in past millennia. It is the study of fossils—the bones, shells, teeth, and other remains of organisms, or evidence of ancient

Download Free Biology Biochemical Evidence For

Evolution, that have survived over eons of time. Paleontology supports the theory of evolution because it shows a descent of modern organisms from common ancestors.

Evolution on Earth is incredibly similar, showing that all of Earth's organisms share a common ancestry.

~~What Evidence Supports the Theory of Evolution?—dummies~~

Evidence for evolution is provided by homologous structures. These are

Download Free Biology Biochemical Evidence For

structures shared by related organisms that were inherited from a common ancestor. Other evidence is provided by analogous structures. These are structures that unrelated organisms share because they evolved for the same function.
