

## Calculus 2 Final Exam Solutions

Getting the books **calculus 2 final exam solutions** now is not type of challenging means. You could not deserted going considering books store or library or borrowing from your links to contact them. This is an categorically simple means to specifically get lead by on-line. This online statement calculus 2 final exam solutions can be one of the options to accompany you similar to having supplementary time.

It will not waste your time. bow to me, the e-book will categorically sky you other thing to read. Just invest little times to edit this on-line statement **calculus 2 final exam solutions** as well as evaluation them wherever you are now.

Calculus 2 Final Exam Solutions

$d^2y/dx^2$  at  $t = 1$ . SOLUTION: Again employing the chain rule,  $d^2y/dx^2$  at  $t=1 = d/dt (dy/dx)$  at  $t=1 = (6t^2)(t+6t)$  at  $t=1 = (6 \cdot 2)(2+6) = 12 \cdot 8 = 96$ . 3.(c). (5 points) Write an integral to compute the total arc length of the curve. Do not evaluate the integral. SOLUTION: Arc length is given by  $\int_0^5 \sqrt{(2t+6t)^2 + (3t^2)^2} dt$ .

FINAL EXAM CALCULUS 2 - Department of Mathematics

1. Evaluate the integral  $\int (x^5 + x^4)(5x^4 + 4x^3) dx$  in three different ways: (a) By multiplying out the integrand, and then integrating term by term. (b) By substitution: put  $u = x^5 + x^4$ . (c) By parts: put  $u = x^5 + x^4$  and  $dv = (5x^4 + 4x^3) dx$ .

MATH 2300: CALCULUS 2 FINAL EXAM

Math 262 - Calculus II Fall 2012. Practice Exams. Please be aware that practice exams are longer in length than the actual exams. They are meant to give an idea of the material to be covered. ... Final Exam Form C (Grey) Lab Solutions. Lab 1 - (8/27/12, due 8/29/12) Lab 2 (8/29/12, due 8/31/12) Lab 3 (9/4/12, due 9/6/12) Lab 4 (9/6/12, due 9/10/12)

Calculus 2 Practice Final Exam With Solutions

$u_2 = \int \sec^2 x dx = \tan(x) + k_2$ ) To get our final answer, we substitute these results into the equation  $(y = u_1 e^{2x} + u_2 x e^{2x})$  and simplify. We also let  $(c_1 = A + k_1)$  and  $(c_2 = B + k_2)$  to combine the constants.
