Abstract. The fourth
edition of Econometric
Methods by Jack
Johnston and John
DiNardo, is a rewrite of
the venerable third
edition by Johnston that

sustained
several generations of
economists. As stated
by the authors
themselves, the reason
for undertaking this
major revision is to
provide a comprehensive
and accessible account
of currently
available econometric
methodology, and in my
opinion they have
been successful in

achieving their
objective.
