Emergent Urbanism contains a range of themes across 'urban planning, urban theory, human geography, sociology, urban design and architecture', treating the city as an integrated entity undergoing structural change. It is structured as a series of 17 short essays with authors from UK, US, Australia and Sweden, and with some black and white photos and diagrams.

Understanding the nature of our past success certainly is good for our existential confusion, but it is pointless unless this understanding allows us to tackle modern challenges. As such, the second mission of Emergent Urbanism is to use computational patterns to tackle contemporary problems, for example with the complex grid model. It does

Urbanity is the cooperation and mutual-
support of large numbers of people in close
proximity. It is inevitably emergent, and to
understand the science of emergence is the
key to inventing the first fully emergent
urbanism, capable of resolving all the
complexities of a 21st century, sustainable
city. Designing cities is possible.
