Exposure Photo Workshop Develop Your Digital Photography ...
Photographic processing or photographic development is the chemical means by which photographic film or paper is treated after photographic exposure to produce a negative or positive image.

Access Free Exposure Develop Your Digital

Photographic processing transforms the latent image into a visible image, makes this permanent and renders it insensitive to light. All processes based upon the gelatin-silver process are similar, regardless of the film or paper's manufacturer. Exceptional variations include instant films such as those made b

A good exposure will include highlights and shadows and a varying degree of contrast in between. It doesn't matter if the photo is in color or black and white. If a photo is too dark, it is underexposed. Details will be lost in the shadows and the darkest areas of the image. If a photo is too light, it is overexposed.
