Next Generation Science Standards - Grade 5. In fifth grade, students should develop an understanding of the nature of matter; how the properties of matter can be used to identify it and determine how it will behave when mixed with other substances; the fact that energy from the Sun moves through food webs, starting with producers, and supplies the energy used by animals for survival and growth; the systems, or spheres that interact and determine Earth's features and characteristics; the ...

### ~~Next Generation Science Standards - Grade 5~~

The entire fifth grade science curriculum is included. 18 full weeks and 90 lessons! (This is 2 quarters or 1 semester...if you are like most teachers you likely alternate teaching science and social studies.)

### ~~5th Grade Lessons Science Next Generation - Home~~

The Next Generation Science Standards (NGSS) are K-12 science content standards. Standards set the expectations for what students should know and be able to do. The NGSS were developed by states to improve science education for all students. A goal for developing the NGSS was to create a set of research-based, up-to-date K-12 science standards.
