China's spectacular economic growth over the past two decades has dramatically depleted the country's natural resources and produced skyrocketing rates of pollution. Environmental degradation in China has also contributed to significant public health problems, mass migration, economic loss, and social unrest. In *The River Runs Black*, Elizabeth C. Economy examines China's growing environmental crisis and its implications for the country's future development. Drawing on historical research, case studies, and interviews with officials, scholars, and activists in China, the author traces the economic and political roots of China's environmental challenge and the evolution of the leadership's response. She argues that China's current approach to environmental protection mirrors the one embraced for economic development: devolving authority to local officials, opening the door to private actors, and inviting participation from the international community, while retaining only weak central control. The result has been a patchwork of environmental protection in which a few wealthy regions with strong leaders and international ties improve their local environments, while most of the country continues to deteriorate, sometimes suffering irrevocable damage. Economy compares China's response with the experience of other societies and sketches out several possible futures for the country. This second edition is updated with information about events during the past five years, covering China's

tumultuous transformation of its economy and its landscape as it deals with the political implications of this behavior as viewed by an international community ever more concerned about climate change and dwindling energy resources.

Moderne Diplomatie wirkt heute in viele Bereiche des modernen Lebens hinein. Sie ist zugleich selbst neuen Einflüssen ausgesetzt. Faktoren, die unsere Gesellschaften verändern, verändern auch unser Regierungshandeln, auch in der Außenpolitik, seien es Digitalisierung, emotionalisierte Sensibilitäten unserer Öffentlichkeiten oder nicht-staatliche internationale Akteure. Derartige Entwicklungen müssen von der Diplomatie aufgenommen werden, damit sie weiter als Instrument einer Regierung funktionieren kann. Regierungen sollten Wege finden, zwischen den neuen Bedürfnissen der Gesellschaft und den Notwendigkeiten legitimen Regierungshandelns zu vermitteln. Das Ziel sollte sein, als souveräner Staat handeln zu können und zugleich das Potential der tiefgreifenden gesellschaftlichen Veränderungen zu nutzen. international relations, and what kinds of strategies they use to secure their interests in a globalized world. With the example of Ireland as a small and classically neutral state, the focus thereby lays on the foreign policy strategy of neutrality. Why do small European states adopt a neutral foreign policy and how does this strategy influence the development of the state? To understand the theoretical background of this theme and to get a clear understanding of the term, first the theoretical concept of small states in international relations needs to be explained in a small overview including various definitions and approaches regarding their foreign policy. Proceeding from a review of their different strategies, the specific neutral strategy gets examined depending on the early political-historical background, different kinds of neutrality and neutrality rights. This will then be applied to the specific Irish case. More in-depth focused here is the question: can the Irish foreign policy in the 21st century still be phrased as neutral and what consequences are entailed in the answer? To achieve this, there is the need for an analysis of the Irish neutrality concept and its development. This will be done in the third part of this work by reviewing the political-historical background of the Irish derivation of the neutrality concept and later also taking into account the latest white paper regarding Ireland's foreign policy from 2015. Also a glance at the meso-level in form of the Irish participation in international organizations like the European Union will be helpful to evaluate Ireland's degree of neutrality. At the end, cases of neutrality conflicts are gonna be pointed out and discussed in regard to the research question.

Awareness has been growing in the United States - and in nations around the world - that the Chinese Communist Party (CCP) has triggered a new era of great-power competition. Yet few discern the pattern in China's inroads within every region of the world, much less the specific form of dominance to which the party aspires. The CCP aims not merely at preeminence within the established world order - an order that is grounded in free and sovereign nation-states, flows from the universal principles on which America was founded, and advances U.S. national interests - but to fundamentally revise world order, placing the People's Republic of China (PRC) at the center and serving Beijing's authoritarian goals and hegemonic ambitions. In the face of the China challenge, the United States must secure freedom. China is a challenge because of its conduct. Modeled on 20th-century Marxist-Leninist dictatorship, the CCP eventually spurred rapid modernization and produced prodigious economic growth - thanks in no small measure to the party's decision in the late 1970s to embrace free-market elements and to the decision by the United States and nations around the world to engage, and welcome commerce with, China. The party today wields its economic power to co-opt and coerce countries around the world; make the societies and politics of foreign nations more accommodating to CCP specifications; and reshape international organizations in line with China's brand of socialism. At the same time, the CCP

is developing a world-class military to rival and eventually surpass the U.S. military. These actions enable the CCP to credibly pursue the quest - proceeding outward through the Indo-Pacific region and encompassing the globe - to achieve "national rejuvenation" culminating in the transformation of the international order. To understand China's peculiar form of authoritarianism and the hegemonic goals to which it gives rise, it is necessary to grasp the intellectual sources from which China's conduct springs: the CCP's Marxist-Leninist beliefs and the party's extreme interpretation of Chinese nationalism.

Once lived a powerful and rich man called Blue Beard. Can you guess why? Well of course because of his beard that was strangely blue. The man himself was also a bit strange, even frightening. He married several times but each time his wife disappeared into thin air. He decided to remarry again and he chose one of his neighbor ' s daughters. Some time passed by and the rich man was about to leave the country. He left his wife a magical key which opened every door in the castle but one. The girl was not allowed to try to enter it. However her curiosity prevailed and she opened the door. What did she see there and will her husband find out that she disobeyed? "Blue Beard" holds the answers.
