This title gives an understanding of land law in two ways. First, by a clear exposure and analysis of the rules of land law, and explanation of why they are formulated in the way they are. Second, by presenting a method of critical thinking so that students can learn what it is to construct a convincing argument about land law.

Providing students with all the material they are likely to need on land law this edition takes account of new developments, in particular the Landlord and Tenant (Covenants) Act 1995 and the Trusts of Land and Appointment of Trustees Act 1996.

Doctrinal and critical, Thompson's Modern Land Law looks at the core areas of this subject area through a theoretical lens. The authors excel at explaining difficult rules and concepts clearly but without oversimplification, guiding students around the common pitfalls in areas where there is typically misunderstanding or confusion. Straightforward accounts of the law are underpinned by insightful author commentary on areas of debate, exposing students to critical reasoning. Examples of the context in which land law operates helps students to understand abstract topics and encourages them to appreciate the social importance of this subject.

Landmark Cases in Land Law is the sixth volume in the Landmark Cases series of collected essays on leading cases (previous volumes in the series having covered Restitution, Contract, Tort, Equity and Family Law). The eleven cases in this volume cover the period 1834 to 2011, although, interestingly, no fewer than six of the cases were decided or reported in the 1980s. The names of the selected cases will be familiar to property lawyers. However, individually, the essays provide a reappraisal of the cases from a wide range of perspectives - focusing on their historical, social or theoretical context, highlighting previously neglected aspects and even questioning their perceived importance. Collectively, the essays explore several common themes that pervade the law of property - the numerus clausus principle, the conclusiveness of registration, the desirability of certainty in the law and the central question of the enforceability of interests through changes in ownership of land. This volume provides a collection of essays that will be of interest to academics, students and practitioners.

In *Claiming the Oriental Gateway*, Shelley Sang-Hee Lee explores the various intersections of urbanization, ethnic identity, and internationalism in the experience of Japanese Americans in early twentieth-century Seattle. She examines the development and self-image of the city by documenting how U.S. expansion, Asian trans-Pacific migration, and internationalism were manifested locally—and how these forces affected residents' relationships with one another and their surroundings. Lee details the significant role Japanese Americans—both immigrants and U.S. born citizens—played in the social and civic life of the city as a means of becoming American. Seattle embraced the idea of cosmopolitanism and boosted its role as a cultural and commercial "Gateway to the Orient" at the same time as it limited the ways in which Asian Americans could participate in the public schools, local art production, civic celebrations, and sports. She also looks at how Japan encouraged the notion of the "gateway" in its participation in the Alaska-Yukon-Pacific Exposition and International Potlatch. *Claiming the Oriental Gateway* thus offers an illuminating study of the "Pacific Era" and trans-Pacific relations in the first four decades of the twentieth century.
