This book is written for students taking courses in monitoring and evaluation both in college and at the university .The outstanding feature of the book lies in its organization. The chapters are arranged in chronological sequence to correspond to the classic steps in monitoring and evaluation systems. By looking at the monitoring and evaluation steps, the reader is presented with a logical & integrated framework. The principles and ideas expressed herein are relevant to any monitoring and evaluation programme.

Whether designing your own evaluation plan or judging the credibility of evaluations conducted by others, here are step-by-step strategies for evaluating grant-funded projects. You get easy-to-follow instructions, examples, and statistical formulas to help you: collect and analyze evaluation information, select sampling methods, write an evaluation report, and much more. Discover the advantages and disadvantages of specific information collection techniques, including achievement tests, rating scales, questionnaires, semantic differentials, time-sampling observations and telephone interviews. Determine the best method for your project to prepare For The increased emphasis funders are placing on monitoring, tracking, and justifying their decision to award you a grant.

For some organizations, Lessons Learned (LL) is an informal process of discussing and recording project experiences during the closure phase. For others, LL is a formal process that occurs at the end of each phase of a project. Regardless of when they are performed, if you are a project team member, chances are you will soon be required to present
