Hornet nests are small and easier to remove in the early spring. A nest that's around the size of a ping pong ball probably only contains a queen and unhatched eggs, so you can just spray it down with a hose. You'll need insecticide to get rid of a larger nest. By summer, nests can grow to the size of a basketball and

contain thousands of  
hornets.

*How to Get Rid of  
Hornets: 13 Steps (with  
Pictures) - wikiHow*

Like other social wasps,  
hornets build communal  
nests by chewing wood  
to make a papery pulp.  
Each nest has one  
queen, which lays eggs  
and is attended by  
workers that, while

# Download Free Hornets Nest

genetically female,  
cannot lay fertile eggs.

*Hornet - Wikipedia*

Look for the nest  
outside and up high in a  
covered area. Hornets  
build their nests in  
outdoor areas and  
usually high above  
ground, such as in trees,  
on a utility pole, or in  
thick shrubs. They will  
also build nests on the
