List of hospital ships sunk in World War II—Wikipedia

The Australian Hospital Ships, using ship prefix AHS, were a number of converted civilian ships used for medical services during the Second World War. They were all staffed primarily by the Army Medical staff. The ships fell into two groups: Australian ships and Dutch ships transferred to the Australian Government. The Dutch ships retained their original Dutch officers and Javanese sailors, with replacements from an international pool being added as necessary, and they also continued to sail und

Hospital Barges
History of the First World War
Hospital Barges used by the British Army on the River Seine and canals in France and Belgium to evacuate casualties : During World War One casualties were evacuated by train, boat and barge. The hospital barges were much slower, but did make for a smoother and more gentle journey.

Hospital Barges France WW1

During the First World War, hospital ships were used to an increasing extent, despite the serious disputes and grave incidents which arose between the belligerents in this regard and to which we...

World-Wide Hospital Ships—GlobalSecurity.org

Note: The title is "Hospital ships of World War II," but the chapters on some individual ships carry out the topic for several decades later (or as long as those ships were in service.) My father was only stationed on a hospital ship in Korea (regular Navy ships the rest of the time), and the book included good material on that ship in that era.

MH106 is not by any means a complete collection of all medical records of those who fought in WWI by some margin as most records are believed to have been destroyed before going into storage after the great war, they are however a representative selection made from hospitals, ambulance units, hospitals ships & trains and convalescent units across the globe, a truly all-encompassing research ...

Military Hospitals Admissions and...—Forces War Records

The biggest shipping loss of both world wars was the hospital ship Britannic, at almost 50,000 tons. Supposedly safe to travel the seas, many hospital ships were lost in both wars. From the smallest of motor launches through steam yachts and converted ocean liners, Campbell McCutcheon tells the story of the First World War hospital ships.
