Human Rights Act 1998 The Human Rights Act brings the European Convention on Human Rights (ECHR) into domestic law, which means that all public authorities must respect and protect your rights. This enables courts in the UK to hear cases about alleged breaches of human rights.

This book critically examines the Human Rights Act 1998 (HRA) and evaluates its impact from a multi-disciplinary perspective. The book includes both a domestic

and international analysis of the effectiveness of the HRA, and also considers possible future developments in policy and practise as well as contemplating the potential for a British Bill of Rights. The editors have collected pieces from contributors drawn from diverse spheres, all of whom are internationally recognised for their impact in the field of human rights law. Contributors include members of the bench in the United Kingdom and Australia, academics, researchers, members of NGOs, and campaigners as well as people's testimony of lived experiences in relation to the Human Rights Act. Valuable contributions from the likes of Costas Douzinas, Keith Ewing, Helen Fenwick, Lady Hale, Irene Khan, Michael Kirby, Francesca Klug, Peter Tatchell and others have resulted in a book which draws out the connections between legal framework, theory, and the actual experience of the protection afforded to groups and individuals by the HRA. *Confronting the Human Rights Act 1998* will be of particular interest to scholars and students of Law, International Studies and Political Science.

In safeguarding national security the Government produces and receives sensitive information. This information must be protected appropriately, as failure to do so may compromise investigations, endanger lives and ultimately lessen its ability to keep the country safe. The increased security and intelligence activity of recent years has led to greater scrutiny including in the civil courts, which have heard a growing numbers of cases challenging Government decisions and actions in the national security sphere. Such cases involve information that under current rules cannot be disclosed in a courtroom. The UK justice system is then either unable to pass judgment and cases collapse or are settled without a judge reaching any conclusions. This green paper aims to respond to the challenges of how sensitive information is treated in the full range of civil proceedings. It looks for solutions that improve the current arrangements while upholding the Government's commitment to the rule of law. It also addresses the need for public reassurance that the national security work is robustly scrutinised, and that the scrutinising bodies are credible and effective. The proposals in this consultation are in three broad areas: enhancing procedural fairness, safeguarding material and reform of intelligence oversight.

Card & James' Business Law is the most detailed and analytical account of business law for those new to the subject. It provides commanding analysis of the English legal system, contract law, tort law, and commercial law together with coverage of company law, and the relevant aspects of employment law. All of this is discussed using relevant examples from the business environment, and the key legal cases to help develop a greater understanding of the interconnections between the law and corporate setting. The new learning features which have been incorporated throughout make a difficult subject more accessible and support study; key case, example, and discussion boxes demonstrate the application of law and highlight core principles, whilst self-test questions allow students to assess their progress. Online Resource Centre The accompanying Online Resource Centre provides a wealth of resources for students to further develop their understanding and test their knowledge, including additional practice questions with answers, a flashcard glossary of key legal terms and quarterly audio updates. Also included is a testbank of MCQs for lecturer use.

The application of the right to life during armed conflict is an issue that polarizes opinion and generates considerable debate. Many believe that human rights law has no place in armed conflict, yet the European Court of Human Rights, and domestic courts, have ruled that it can apply. The exact contours of how the right to life applies during armed conflict remain largely unresolved. In this text, Ian Park seeks to clearly articulate the right to life obligations of states during both international and non-international armed conflict in respect of those individuals affected by the actions of states' armed forces and members of the armed forces themselves. In determining the right to life obligations of states, Park identifies the sources of law from which right to life obligations arise, how case law has developed and modified these obligations, and analyses how the law creates obligations in practice. Implicit in this analysis is a consideration of recent armed conflicts, and the actions of states, that lead to a series of concrete proposals designed to best ensure compliance with a state's right to life obligations.
