Duncan Aviation: Engine TestingJet Engine Test Cell Operator

For each test the engine is run through a test sequence. Dependent upon the resulting data it may be necessary to rerun steps in the sequence in any order. Three engineers conduct each test acting as Operator, Recorder and Controller. Each engineer has a monitor screen for monitoring the test data and any alarm conditions to occur. Data is displayed using a combination of dials and trend graphs with the Operator having a different screen configuration to the other test engineers.
