The most common type of jig is the
drill jig, which guides the drill bit for

Access Free Jigs And Fixtures Non Standard

Creating holes at desired locations. Using of drill jigs increases production rate drastically by eliminating the time spent using a square scribe, height gauge, center punch, etc. The fixture is the tool which holds the work piece with the machine bed precisely at the desired location.

Jigs and Fixtures - Applications and
Difference Between ...

Jigs and Fixtures are production tools used to accurately manufacturing duplicate and interchangeable parts. They are specially designed so that a large number of components can be

Access Free Jigs And Fixtures Non Standard

machined or assembled identically, and to ensure interchangeability of components. They eliminate the necessity of a special set up for each individual part.
