Among those profiled are prominent government figures, high-ranking military officers, leaders of the largest corporations in each country, heads of religious organizations, pioneers in science & the arts & many more.

China is one of the fastest developing emerging economies in the world today. The country has a huge influence on a global level, both politically and economically. Despite this, very few books cover both the full range of management functions, and the key issues facing managers in this unique business environment. The Changing Face of Management in China explores the key challenges facing businesses and managers in China, across management functions, as well as across a range of sectors and organization types. Written by prominent scholars with direct experience in this market, this book adds to the existing body of knowledge by examining a range of areas of Chinese management in the context of local political, economic and social traditions, and the global economy. Part of the successful Working in Asia series, this book includes case studies that allow the voices of local managers to be heard, as well as extensive bibliographies pointing students and researchers to the most up-to-date sources of information in this important area.

The case for revolutionizing the U.S. economy, from a leadingCEO America used to define itself by the things we built. Wedesigned and produced the world's most important innovations, andin doing so, created a vibrant manufacturing sector thatestablished the middle class. We manufactured our way to the topand became the undisputed economic leader of the world. But overthe last several decades, and especially in the last ten years, thesector that was America's great pride has eroded, costing usmillions of jobs and putting our long-term prosperity at risk. Now,as we struggle to recover from the worst recession in generations,our only chance to turn things around is to revive the Americanmanufacturing sector—and to revolutionize it. In Make Itin America: The Case for Reinventing the Economy, AndrewLiveris—Chairman and CEO of The Dow ChemicalCompany—offers a thoughtful and passionate argument thatAmerica's future economic growth and prosperity depends on thestrength of its manufacturing sector. The book explains how a manufacturing sector creates economicvalue on a scale unmatched by any other, and how central the sectoris to creating jobs both inside and outside the factory Explores how other nations are building their manufacturingsectors to stay competitive in the global economy, and describeshow America has failed to keep up Provides an aggressive, practical, and comprehensive agendathat will put the U.S. back on track to lead the world It's time to stop accepting as inevitable the shuttering offactories and staggering job losses that have come to definemanufacturing. It's time to acknowledge the cost of inaction. Thereis no better company to make the case for reviving U.S.manufacturing than The Dow Chemical Company, one of the world'slargest manufacturers and most global corporations. And there's nobetter book to show why it needs to be done and how to do it thanMake It in America.

Hong Kong Taxation: Law and Practice 2008-09 is a professional book on the Hong Kong tax system. It explains in detail the three main categories of taxes under the Inland Revenue Ordinance: Property Tax, Salaries Tax, and Profits Tax. Chapters cover Stamp Duty and the international aspects of Hong Kong taxes. The book is available in Chinese as well, translated by Ayesha Macpherson.

Enron killed Arthur Andersen in 2002, leaving only Deloitte, EY, KPMG and PwC. Now the Big Four, with a total revenue of \$127 billion, face major threats that need immediate attention. Count Down looks at today's model and proposes a new Big Audit, fit to serve the capital markets of the 21st century.

Entrepreneur's guide for starting and growing a business to a public listing

Der Autor leitet Strategien zur Markterschließung Chinas ab und berücksichtigt dabei sowohl Auswahl, Vorbereitung und Entlohnung von westlichen Führungskräften als auch Rekrutierung und Erhaltung von lokalem chinesischem Personal.

The inspirational business story of Huawei: how to grow from start up to world leader in two decades... With over 170,000 employees in more than 170 countries and regions, serving more than one-third of the world's population, how does entrepreneur Ren Zhengfei manage a telcoms giant called Huawei? What is the secret to Huawei's global success? In 1987, a 44-year-old man founded a telecom equipment-trading firm in Shenzhen, China, with start-up capital of \$5,000. In 29 years, it grew to become the largest telcoms company in the world. This book goes behind the scenes to explore the story of what Ren Zhengfei did differently, how the company he started reached the top spot, and why Huawei is known as a "collective" and not a private company: Learn how this Chinese start up business became an international success Understand the business strategy, leadership skills and management philosophy of Huawei's entrepreneurial founder Get tips, inspiration and motivation for your own business start-up. 14 years of meticulous research and 136 senior management and employee interviews reveal how Huawei's international business success lies in its ability to transform the intellectual elite into a band of soldiers with the same set of values and resolve, while at the same time preventing a culture of subservience. This fascinating story provides a unique glimpse into the machinations of one of the world's most powerful companies. "The company serves as an example for many Chinese entrepreneurs striving to go global, and also presents valuable lessons for Western companies striving to integrate Eastern and Western values and ways of looking at business." - Co-author David De Cremer, KPMG Professor of Management Studies at Cambridge Judge Business School

This guide provides a practical, basic introduction to the tax consequences of transferring executives and specialists from one country to another.
