Lifan itself seems really good. But not sure bout a 110cc for on road. A 125cc is a lil bit more expensive but atleast you know you keeping up with traffic. My lifan 125 is amazing, sounds great, doesnt go through too many spark plugs, Very easy to work on and even though i havent rode my new engine i can tell it aint an engine for the weekend ...

The engine maintenance manuals for the 200cc engines used on the china-bikes have not worked their way over to the states yet. Expect that only the bigger resellers (American Lifan and Yamoto) have notes on these, but no english manuals. The XR200 is very close in physical dimensions to these engines.

Compiled and updated from the two Floyd Clymer books, 'Handbook of Imported Carburetors & Fuel Injection' and 'BMC Mini Cars Handbook', this publication is specific to the H, HS and HD series of SU carburetors, specifically the H1, H2, HS2, H4, HS4, H6, HS6, HD6 & HD8 types.

This is a chronological history of the Sufi tradition, divided in to three sections, early, middle and modern periods. The book comprises 35 independent chapters with easily identifiable themes and/or geographical threads, all written by recognised experts in the field. The volume outlines the origins and early developments of Sufism by assessing the formative thinkers and practitioners and investigating specific pietistic themes. The middle period contains an examination of the emergence of the Sufi Orders and illustrates the diversity of the tradition. This middle period also analyses the fate of Sufism during the time of the Gunpowder Empires. Finally, the end period includes representative surveys of Sufism in several countries, both in the West and in traditional "Islamic" regions. This comprehensive and up-to-date collection of studies provides a guide to the Sufi tradition. The Handbook is a valuable resource for students and researchers with an interest in religion, Islamic Studies and Middle Eastern Studies.
