In its US edition, "Principles of Accounting" has been a market leading introductory accounting textbook for over 20 years. The Australasian adaptation of this highly regarded textbook accentuates its relevance to both students and academics alike with its constructive pedagogical structure, application of accounting to a wider business environment, and clear, easy-to-understand writing style. As accounting is the international language of business, with many students expecting their qualifications to open career opportunities internationally, "Principles of Accounting 2nd edition" aligns to the conceptual framework and financial reporting requirements under IFRS, as well as presenting real company financial information from the Australasian region. Throughout all chapters, accounting processes and systems are applied and illustrated with either real businesses or constructive hypothetical examples. A unique feature of the textbook is that it can be used in either a one semester or two semester introductory accounting subject. Students who study with this textbook will be equipped with knowledge and skills required for their further accounting studies and eventual career as an accounting professional.

Offering a unique approach in the field, this book presents the principles of accounting from a corporate perspective. This provides readers with a real-world understanding of the concepts. It starts with a discussion of real financial statements first, clearly showing how they communicate the financing, operation, and investing activities of a business. The book then helps readers gain the skills, and the confidence they need to use those skills effectively in making business decisions.

New edition retains the popular step-by-step introduction to basic accounting concepts, principles, and procedures leading to a basic accounting system. 2nd edition substantially increases the number of problems and solutions, and adds chapters on partnerships and financial analysis methods. Book comprehensively covers proprietorship, corporation, and partnership accounting.
