Including pregnant female - VWR International

The rat is a typical mammal. Formerly guinea pig (*Cavia* sp.) (Fig. 19.1) were used for dissection in most of the undergraduate and postgraduate colleges in Indian Universities. Of late, due to prevailing high cost, guinea pig is being replaced by rat. Four species of rats are common in India, of which three are wild.

Dissection of Rat (With Diagram) | Zoology

The major organs of the rat are revealed in this dissection, useful for anatomy or biology classes that focus on the organ systems.

Rat Dissection - YouTube

Dissection. Dissecting tools will be used to open the body cavity of the rat and observe the structures. Keep in mind that dissecting does not mean "to cut up"; in fact, it means "to expose to view". Careful dissecting techniques will be needed to observe all the structures and their connections to other structures. You will not need to use a scalpel.

Rat Dissection Introduction - The Biology Corner

1. Observe the interior of the rat for any veins and arteries. Veins carry used blood (blue) back to the heart and lungs. Arteries carry oxygenated blood to the muscles and organs that need it. The arteries in your rat should be stained red for easy identification. Use Figures 3 and 4 to help you locate the major veins and arteries.

RAT DISSECTION

A rat dissection is a perfect way to show all the organs in the body. You can analyse the circulatory system, respiratory system and digestive system through this dissection. As you are dealing with a organisms make sure you clean your benches after use, use gloves and a lab coat. Take the appropriate safety steps when dealing with

the dissecting tools and dispose of the rat appropriately.

rat dissection - Evolving Sciences

The revised and enhanced trimming guides are published in a series of three papers of which this is the first. The instructions are presented according to organ systems, organ-by-organ. In general, each organ description is valid for rat and mouse tissues but most of the gross and histopathological images are taken from the rat.

Carolina Rat Dissection Guide FULL Version HD Quality ...

Place the rat on its back, on a dissection pad, and stretch out and pin the four limbs to the pad. Start the dissection by removing the skin. Using forceps to lift the skin, carefully cut away with the scissors, take care not to cut too deep. Start at the top of the chest and cut towards the tail end, avoiding the genital area.

Rat Dissection Lesson Plan | Study.com

Procedure: Skinning the Rat You will carefully remove the skin of the rat to expose the muscles below. This task is best accomplished by making a small incision with your scalpel and then using your probe to separate the connective tissues that connect the skin to the first layer of muscles. Do not cut into the muscles!
