Today, young cosmetics researchers who have completed their graduate studies and have entered a cosmetics company are put through several years of training before they become qualified to design cosmetics formulations themselves. They are trained so that they can design formulas not by a process of logic but by heart, like craftsmen, chefs, or carpenters. This kind of training seems a terrible waste of labor and time. To address this issue and allow young scientists to design novel cosmetics formulations, effectively bringing greater diversity of innovation to the industry, this book provides a key set of skills and the knowledge necessary for such pursuits. The volume provides the comprehensive knowledge and instruction necessary for researchers to design and create cosmetics products. The book ' s chapters cover a comprehensive list of topics, which include, among others, the basics of cosmetics, such as the raw materials of cosmetics and their application; practical techniques and technologies for designing and manufacturing cosmetics, as well as theoretical knowledge; emulsification; sensory evaluations of cosmetic ingredients; and how to create products such as soap-based cleansers, shampoos, conditioners, creams, and others. The potential for innovation is great in Japan ' s cosmetics industry. This book expresses the hope that the high level of dedicated research continues and proliferates, especially among those who are innovators at heart.

The history, science, and social aspects of today ' s Thai agriculture is traced from hunters and gatherers through agro-cities through State-religious Empires and immigrating Tai to produce a sustainable agriculture. The wet glutinous rice culture determined administrative structures in a pragmatic society which regularly produced a saleable surplus. Continuing today, these systems consolidated the importance of rice agriculture to national security and economic well-being, as Chinese and European influence benefited agribusiness and initiated the demand which would expand agriculture through population increase until accessible land was expended. As agriculture declined in relative financial importance, it continued to provide the benefits of employment, crisis resilience, self-sufficiency, rural social support, and cultural custody. Agricultural institutions evolved from a taxation and dispute resolution base to provide research, education, and technology transfer at levels below potential as they supported commercial agriculture funded by credit. Agribusiness expanded from the 1960s and small-holders were partly viewed as a past relic which agribusiness could modernise. Unique elements of Thai agriculture include: irrigation technologies; administrative structures based on water control; global leadership in many agricultural commodities; multinational agribusiness; negotiating approaches; potential for further increases from known technologies, and an open culture which has embraced new ideas. One of the world ' s few major agricultural exporters, Thailand leads the world in rice, rubber, canned pineapple, and black tiger prawn production and export, the region in chicken meat export and several other commodities, and feeds more the four times its own population from less intensive agriculture than its neighbours. Poised to benefit from expansion in livestock demand, poverty reduction, and improved education, research, and legal and social systems, evident in the recent Asian financial crisis, will be considered with popular concern for socially sensitive alternatives for small-holder farmers to co-exist with commercial agriculture. Thailand will likely remain one of the world ' s major agricultural countries in social, environmental and economic terms for the foreseeable future, as it addresses the continuing rural issues of poverty and inequity.

This publication reviews wooden furniture markets in United States, Canada, China, Japan, Egypt, France, Germany, Belgium, the Netherlands, Luxembourg, Spain, Italy, Denmark, and Sweden. For each country, it provides an overview of basic demand factors and market drivers, the domestic furniture industry, market trends and developments, distribution channels, and market access conditions. It deals with technical standards, as well as international and national certification schemes in the furniture sector, and identifies furniture networks and clusters. It outlines a strategy for developing the wooden furniture sector in tropical countries and outlines step-by-step value-added processing of wooden furniture in tropical countries, based on local conditions. It also includes statistical data, selected German furniture standards, a list of useful contacts in China, and list of members of the Global Forest and Trade Network.

Waking up knee-deep in the San Francisco Bay with no memory of her past, Lucie learns that she has a rare form of amnesia and reunites with a loving fianc é she does not recognize only to discover unsettling truths about her own personality, findings that are complicated by unsettling changes in her fianc é ' s feelings. By the author of When She Flew.

The destruction of the tropical forests proceeds Nobody at the symposium believed that the rapidly. We all know that this has global ecologi tropical forest area would remain untouched. cal and economical consequences. The problem The population explosion takes care of that argu is of such magnitude that it can only be com ment. The two main problem areas before us are pared to warfare. The destruction of tropical first the wise utilization of that portion of the forests is not only detrimental to the global forest which will be used - especially the intro ecology but also pose a serious threat to the duction of planned forestry in such areas, and people living in this area. Furthermore the over second, the development of a good plan for utilization of such a valuable resource poses a nature conservation in the tropics. serious threat to the next generations. The papers presented at the symposium will Apart from the problem generated for the most certainly not solve all the problems but we people in those regions and on earth in general hope they contribute to the very much needed, there is a moral obligation to preserve the vast continued discussion of possible solutions which biological diversity in the tropical forests. We must be implemented in the near future.

This volume compiles topics from the REWAS 2013 symposium at the TMS Annual Meeting, focusing on different aspects of sustainability. It discusses how to realize sustainability in such areas as transportation, the built environment, electrical and electronic equipment and infrastructure, energy production, and water systems. Enabling sustainability topics include the use of metals and materials processing, recycling and recovery, as well as process design and modeling. The book focuses on understanding sustainability through life cycle management and analysis, systems modeling and design, and education and consumer awareness.

Offers a collection of true facts about animals, food, science, pop culture, outer space, geography, and weather.

The purpose of this clearly-written volume is to apply a model of social relations to phenomena including hypnosis, hysteria, multiple personality disorder, claims of satanic ritual abuse, alien abduction syndrome, and culture-specific disorders in order to provide a fascinating new explanation for them.
