Written as a companion volume to the earlier *World's Greatest Military Spies and Secret Service Agents*, George Barton's 1919 work examines espionage during the Great War. In addition to covering the exploits of World War I's greatest spies, the work also investigates various mysteries and adventures associated with the conflict. Photographs and illustrations of various personalities enliven the account.

Set on the eve of the First World War, across oceans and continents, steamliners and cross-country trains, David Downing's complex and thrilling new espionage novel takes us all the way back to the dawn of that most fascinating of 20th century characters—the spy. It is 1913, and those who follow the news closely can see the world is teetering on the brink of war. Jack McColl, a Scottish car salesman

With an uncanny ear for languages, has always hoped to make a job for himself as a spy. As his sales calls take him from city to great city—Hong Kong to Shanghai to San Francisco to New York—he moonlights collecting intelligence for His Majesty's Secret Service, but British espionage is in its infancy and Jack has nothing but a shoestring budget and the very tenuous protection of a boss in far-away London. He knows, though, that a geopolitical catastrophe is brewing, and now is both the moment to prove himself and the moment his country needs him most. Unfortunately, this is also the moment he begins to realize what his aspiration might cost him. He understands his life is at stake when activities in China suddenly escalate from innocent data-gathering and casual strolls along German military concessions to arrest warrants and knife attacks. Meanwhile, a sharp, vivacious

Best-selling author James Morton tells the story of organized espionage in Britain from spy fever early in the 20th century to the end of the First World War and the rise of air intelligence. He introduces us to a world of colorful characters and dark underhand dealing in which spies, male and female, driven by love, money, patriotism or a mix of all of them,

struggled to survive. The first English officer spies are featured alongside their frequently flamboyant French, Belgian and German counterparts - from the hunchback dentist Wilhelm Klauer to the 'Grande (and lesser) horizontales' such as Mata Hari. So too are their controllers such as authors John Buchan and Somerset Maugham and men like Richard Tinsley who oversaw a network of some 2000 spies from Holland. As professionalism grew great successes emerged - not least the deciphering of the intercepted Zimmerman telegram - along with notable failures. Morton tackles both in a meticulously researched narrative that balances the history of espionage with the human stories of individuals and tales of heroism with cowardice, incompetence and betrayal.

When the United States declared war on Germany in April 1917, it was woefully unprepared to wage a modern war.

Whereas their European counterparts already had three years of experience in using code and cipher systems in the war, American cryptologists had to help in the building of a military intelligence unit from scratch. This book relates the personal experiences of one such character, providing a uniquely American perspective on the Great War. It is a story of spies, coded letters, plots to blow up ships and munitions plants, secret inks, arms smuggling, treason, and desperate battlefield messages. Yet it all begins with a college English professor and Chaucer scholar named John Mathews Manly. In 1927, John Manly wrote a series of articles on his service in the Code and Cipher Section (MI-8) of the U.S. Army

Military Intelligence Division (MID) during World War I. Published here for the first time, enhanced with references and annotations for additional context, these articles form the basis of an exciting exploration of American military intelligence and counter-espionage in 1917-1918. Illustrating the thoughts of prisoners of war, draftees, German spies, and ordinary Americans with secrets to hide, the messages deciphered by Manly provide a fascinating insight into the state of mind of a nation at war.
