The Unbound Prometheus: Technical Change and Industrial ...

For over thirty years David S. Landes's *The Unbound Prometheus* has offered an unrivalled history of industrial revolution and economic development in Europe. Now, in this new edition, the author reframes and reasserts his original arguments in the light of current debates about globalisation and comparative economic growth. The book begins with a classic account of the characteristics ...

The Unbound Prometheus: Technological Change and ...

THE UNBOUND PROMETHEUS Thus the climb of those industries that were at the heart of the Industrial Revolution—textiles, iron and steel, heavy chemicals, steam engineering, railway transport—began to slow toward the end of the nineteenth century in the most advanced west European countries, so much so that some observers feared that the whole system was running down.

## Read Free The Unbound Prometheus Technical Change And Industrial Development In Western Europe From 1750 To Present

The history of nations is a history of haves and have-nots, and as we approach the millennium, the gap between rich and poor countries is widening. In this engrossing and important new work, eminent historian David Landes explores the complex, fascinating and often startling causes of the wealth and poverty of nations. The answers are found not only in the large forces at work in economies: geography, religion, the broad swings of politics, but also in the small surprising details. In Europe, the invention of spectacles doubled the working life of skilled craftsmen, and played a prominent role in the creation of articulated machines, and in China, the failure to adopt the clock fundamentally hindered economic development. The relief of poverty is vital to the survival of us all. As David Landes brilliantly shows, the key to future success lies in understanding the lessons the past has to teach us - lessons uniquely imparted in this groundbreaking and vital book which exemplifies narrative history at its best.

From the author of the New York Times bestseller *The Wealth and Poverty of Nations*, a fascinating look at the crossroads of kin and coin David S. Landes has earned a reputation as a brilliant writer and iconoclast among economic historians. In his latest acclaimed work, he takes a revealing look at the quality that distinguishes a third of today's Fortune 500 companies: family ownership. From the banking fortunes of Rothschild and Morgan to the automobile empires of Ford and Toyota, Landes explores thirteen different dynasties, revealing what lay behind their successes-and how extravagance, bad behavior, and poor enterprise brought some of them to their knees. A colorful history that is full of surprising conclusions, *Dynasties* is an engrossing mix of ambition, eccentricity, and wealth.

First published in 1979, *The Transformation of England* discusses the creation in late eighteenth century England of the industrial system and thereby the present world. Professor Mathias poses questions about the nature of industrialization, social change and historical explanation, issues that are his principal scholarly concern. This series of essays is divided into two groups. The first group of essays focuses upon general themes such as the 'uniqueness' in Europe of the industrial revolution, capital formation, taxation, the growth of skills, science and technical change, leisure and wages, and diagnoses of poverty. In the second section, Professor Mathias focuses on the social structure in the eighteenth century, considering the industrialization of brewing, coinage, agriculture and the drink industries, advances in public health and the armed forces, British and American public finance in the War of Independence, Dr Johnson and the business world.
