The Way of the Four Elements is one of the most magical of all the monk subclasses, using ki to produce air, earth, fire, and water from their body's own energy. While most other monk subclasses grant distinct features at 3rd, 6th, 11th, and 17th level, the Way of the Four Elements has only one feature: Disciple of the Elements, which is gained at 3rd level.

An answered prayer for Beatles fans and collectors, the first volume of a unique work that exhaustively chronicles all known and available Beatles recordings! Have you ever watched a Beatles film clip and wondered: • Where was that filmed? • Is any more of that footage available? Have you ever heard a Beatles interview and asked: • When was that taped? • Where's the best place to find the complete recording? Way Beyond Compare has the answers to these and thousands of similar questions. It's the key to unlocking the secrets behind every known Beatles recording in circulation through 1965, telling you where to find them, what makes them unique, and how they fit within the context of the Beatles' amazing musical and cultural journey. Author John C. Winn has spent twenty years (twice as long as the Beatles were together!) sifting through, scrutinizing, organizing, and analyzing hundreds of hours of audio and video recordings—and putting them into a digestible chronological framework for Way Beyond Compare and its companion volume, That Magic Feeling: The Beatles' Recorded Legacy, Volume Two, 1966-1970. "It takes a rare and special kind of mind to sift through it all, to research and enquire, catalogue and chronicle, assess and contrast, identify and label, and to fit all the myriad pieces into the vast jigsaw puzzle that is the Beatles' career. John C. Winn is that person, and he's done it with a rare skill and intelligence." -Mark Lewisohn

An inspirational bible for monochrome photography - this second edition almost doubles the content of its predecessor showing you the path from visualization to print

The Org is an ancient and mysterious organization that supervises the human species genetic, behavioral, and technological advancement. It manages annihilation and apocalypse at the civilization level. A young apprentice, Alex Lucent, was recruited under one of the finest organization agents. Under some unforeseen circumstances, he came across two choices, either to quit or to set out on a very dangerous quest to fight against someone with the intention to shatter the equilibrium of the fabric of space-time itself. There exist four sub-realities: Dataverse, Entropyverse, Energyverse, and Dark matterverse. Everything that we see and interact with, corresponds to these sub-realities. If one attains all the sub-realities by opening a portal to it, one would be able to harness the four fundamental forces of nature at his/her will. That means the ability to bypass the laws of nature, theoretically bend reality and jump through space-time. This was a master plan by the antagonist Volkan, a brilliant manipulative rogue agent, fueled with greed and vengeance. Alex has to learn the ways of the organization agents and prevent the obliteration of the linearity of order and chaos. He would embark on a journey to the unknown, a journey of self-discovery, friendship, and love. The limits of his spirit would be tested, he has to take many unpleasant decisions for the greater good. Not only does he have to stop Volkan, but he also has to make sure that, good or evil, no one should possess the ability to bend reality.

New to this edition: almost double the content a new section discussing the path from visualization to print, illustrating the interaction between eye and brain, explaining the rules of composition and when to break them to produce photographs with impact a new section on presentation including hands-on mounting, matting, spotting, and framing image capture has a more in-depth focus, now covering pinhole photography and digital capture now includes making and printing with digital negatives a new section discussing the pros and cons of typical image-taking and image-making equipment plus new do-it-yourself projects, including many darkroom tools and an electronic shutter tester a useful collection of templates, to copy, -

The education of their children is of paramount importance to all Indian parents. They spend tens of thousands of crores each year to get their young educated. The country fetes its successful students : from class X to board toppers and those who 'crack the IIT JEE' to those who clear the civil- services examination. Yet things on the ground are dire. About 70 per cent of all students ( in villages, towns and cities) have to make do with inferior schooling. Metropolitan newspapers are full of the difficulty of getting a nursery seat in a good school. And while there is a seat crunch in the better colleges too, only 10 per cent of all students between the ages of 18 and 21 are enrolled in college. Crores of educated Indians discover too late that they do not have the skills to land a suitable job. Y.S. Rajan examines the gamut of issues involved in India's efforts to educate its young people and the work required to fix schools, vocational training centres, colleges and universities. He argues that Indian education needs reforms on a scale comparable to those which freed the economy of the shackles of the licence-permit raj almost twenty years ago.

This new book has taken many years of spiritual exploration to create. It explores spirituality within various religions, and finds spiritual gems within each religion while discarding what is contrary to universal human spirituality. The book tries to tear out of religion whatever is tearing humanity apart. It extracts ideas and teachings from our various religions that give us the ability to practice the trimmings of simple spirituality free from the trappings of religious dogma. It reviews various approaches to meditation, and finds a simple letting-go meditation practice which opens up our innate spirituality. This method works for everybody, and is free of religious exclusivity. The meditation practice is based on the teachings of the Tao, Zen, and the Hindu Upanishads, and is consistent with Islamic and Christian spirituality. Finally, it teaches and guides us in bringing the spirituality acquired from prayer and meditation into our everyday lives. This insightful and inspiring book is a call to set spirituality free from the dead-weight of religious dogma. It fearlessly exposes the madness of religious fundamentalism and offers instead the loving kindness of genuine spiritual awakening. Bigoted religion is a source of most of the conflicts bedeviling our world today. In this book Raja Bhat offers an exciting alternative: spirituality transcending religion. Timothy Preke, author and co-author of numerous books on religion and spirituality, such as Encyclopedia of Spirituality: The Jesus Mysteries; Jesus And The Lost Goddess; Spiritual Traditions: Essential Teachings To Transform Your Life; The Complete Guide To World Mysticism and many others.

With over 800 of the most closely guarded photographic "tricks of the trade," this boxed set—consisting of all four parts of Scott Kelly's best-selling series, The Digital Photography Book—is the ultimate resource for any one who wants to shoot dramatically better-looking, sharper, more colorful, more professional-looking photos every time. Scott Kelly, the man who changed the "digital darkroom" forever with his groundbreaking, best-selling The Photoshop Book for Digital Photographers, now tackles the most important side of digital photography—how to take professional-quality shots using the same tricks today's top digital pros use (and it's easier than you think). These aren't books of theory, full of confusing jargon and detailed concepts. These are books on which button to push, which setting to use, and when to use it. Each page covers a single concept on how to make your photography better. Every time you turn the page, you'll learn another pro setting, tool, or trick to transform your work from snapshots into gallery prints. If you're tired of shots that look "okay," and if you're tired of looking in photography magazines and thinking, "Why don't my shots look like that?" then these are the books for you.
