World Figure 1: Growth of world manufacturing output, percentage change compared to the same quarter of the previous year Manufacturing production of developing and emerging industrial economies¹ (excluding China) recorded a decline in output of 22.0 per cent and 2.3 per cent for the second and rst quarters of 2020, respectively.

World Manufacturing Production - unido.org

During the second quarter of 2020, manufacturing production fell sharply in most countries around the world, with the notable exception of China where output had already returned to moderate growth. On current estimates, UNIDO expects a decline in global manufacturing value added of 8.4 per cent for the year as a whole, which would make 2020 the worst year on official records for the sector.

World manufacturing set for biggest collapse in ... - UNIDO

Global manufacturing production drops sharply due to economic disruptions caused by COVID-19 – UNIDO report. VIENNA, 3 June 2020 - World manufacturing production already indicated an overall economic slowdown in 2019 but, in the first quarter of 2020, manufacturing output growth registered a sharp decline of 6.0 per cent. This decline is attributable to China's lockdown to contain the spread of COVID-19, as well as ongoing uncertainties due to restrictions on trade between the US and ...
